OAR 3003 - Preliminary Report,
Supplement 1

Date of Information - 27 November 1960

PAR-595-60/Z
9 December 1960
Page 1 of 1
Copy No 52

Further observation of Campo Libertad Airfield (23-05N 82-27W) reveals 52 pieces of field artillery (probably 76 mm), 24 possible field artillery pieces, two 3-gun antiaircraft (machine gun) positions, and two 3-gun antiaircraft (machine gun) positions probably under construction.

The 52 pieces of field artillery are arranged in eight groups of six guns each and one group of four guns. The eight groups of six guns each are located on the infield north of the E/W runway. The group of four guns is immediately adjacent to the south side of the E/W runway.

The 24 possible field artillery pieces are located on the north side of the NE/SW runway.

The two 3-gun antiaircraft positions, probably occupied, are located along the N/E runway. One position is located at the extreme west end of the runway, and the other position is on the north side of the runway near the servicing apron.

Of the two 3-gun antiaircraft positions which are probably under construction, one is located at the extreme southwest end of the NE/SW runway, and the other is located in the infield north of the E/W runway.
